

● Keelbell

Concept — in development. Estimated prices.

Know she's fine before you drive to the marina.

A 12-volt box by your house battery. When the bilge runs more than usual, the high-water float trips, shore power drops or the battery sags, it sends a text to your phone.

Keelbell Alerts · text message · 2:47 AM

Bilge pump ran 6 times since 1:10 a.m. · Slip C-14

Keelbell Alerts · text message · 6:12 AM

Shore power restored · 6:12 a.m. · Slip C-14

Example text alerts.

\$249

estimated · founders \$199, first 100

Concept render · 112 × 78 × 35 mm. Final design may change.

10 years of cellular data included (planned). No subscription.

Alert texts come from our server, included for the 10 years (planned). Then renew for about \$15 (est.), or it stops sending.

keelbell.burakali.com

Join the list for the founders price. Nothing is charged; reservations aren't open yet.

● ThruTank

Holding-tank gauge designed to read through the wall. Est. \$119. Plastic or fiberglass tanks, not metal. Founders \$99.

thrutank.burakali.com

Concepts in development; may not ship; not for sale. Keelbell is a notification aid, not a safety device; alerts depend on cell coverage. Questions: keelbell@burakali.com. Burak Unlu, Johns Hopkins engineering student, his own project · pebl health inc., Baltimore.
